Art Unit: 2653

**Election/Restriction**

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

Group I; Claims 10-16,23-39 are drawn to a method of manufacturing a micro-electro-mechanical device used in a disk drive, classified in Class 438, subclass 761.

Group II; Claims 1-9,17-22 are drawn to a micro-electro-mechanical device used in a disk drive, classified in Class 360, subclass 294.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process. See MPEP § 806.05(f).

In the instant case the article can be fabricated using steps which do not follow the same chronological order of the claimed process steps and/or may omit certain step(s).

Art Unit: 2653

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and require divergent fields of search, restriction for examination purposes as indicated is proper.

3. Telephonic contact was attempted to be made with Mr. B.A. Santarlli on 3 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2653
